* Free Presentations and Field Trips!

Our Ecology minded School Programs include a Marine, Birds and Freshwater Presentation, Educational Resource Kit and field experience. This program is linked to BC Science PLO's for grades 2-7! An outline of applicable PLO's is included in the resource binder.

What it looks like: A naturalist (and certified teacher) comes to the classroom with an engaging and interactive powerpoint presentation for the class (about 1 hour in length) plus some "primary source" materials (for "show and tell"). A teaching resource kit, which includes field guides, samples, books, activity ideas and resource binder is left in your classroom for a couple of weeks. The field experience (for the Marine and Bird presentation) is booked and led by the naturalist. In the Freshwater presentation, a "pond in the classroom" is set up for observation and viewing over a two week period.

* **Linked to BC Science PLO's gr.2-7**

* **Led by local area naturalist and certified teacher, Lynn Pollard**
